

Add Pizzazz With ProDAD

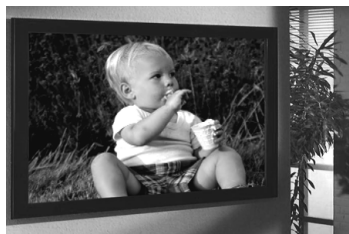

You can now enhance your ScreenPlay and Sequel video editing projects with an eclectic array of frames & wipes from ProDad. Applied Magic is including a sampling of these dynamic enhancement tools on your new 2.5 version of the ScreenPlay/Sequel software.

ProDAD Frames are static graphics that over lay your video using the graphic timeline of the storyboard. These effects are similar to Luma Key, but are processed in real-time. Just drag & drop a frame over a videoclip on the storyboard, and take a look. No rendering! No waiting!

We are confident that you will be impressed with these samples. In fact, we teamed up with ProDad to develop a three-volume library of these high-quality frames and wipes for ScreenPlay and Sequel. The volume includes 150 graphic frames and 150 unique wipes for € 140,00.

To purchase ProDAD frames and wipes, contact your local Applied Magic dealer or Applied Magic Europe at:
